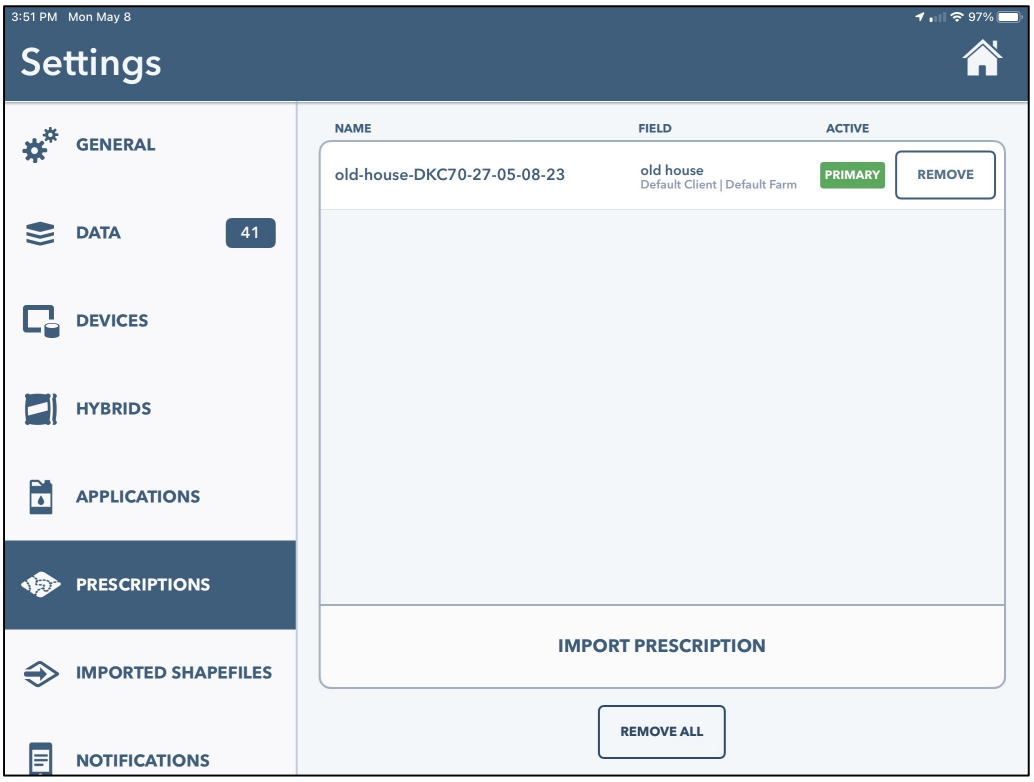
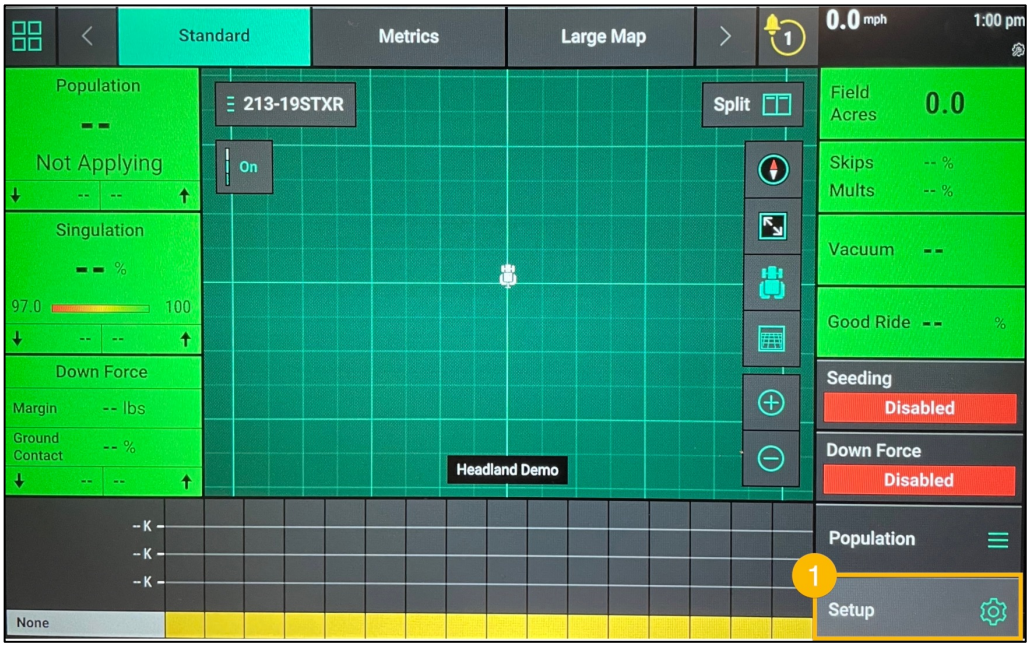
# Syncing and Executing Prescriptions on Precision Planting® Gen 3 20|20® from FieldView™ Cab App

## Syncing Prescriptions

- The Precision Planting® Gen 3 20|20® will need to be on version 2022.0.0 or newer in order to follow these steps
- The prescriptions will need to CloudSync to the FieldView™ Cab app before importing scripts into the Gen 3 20|20

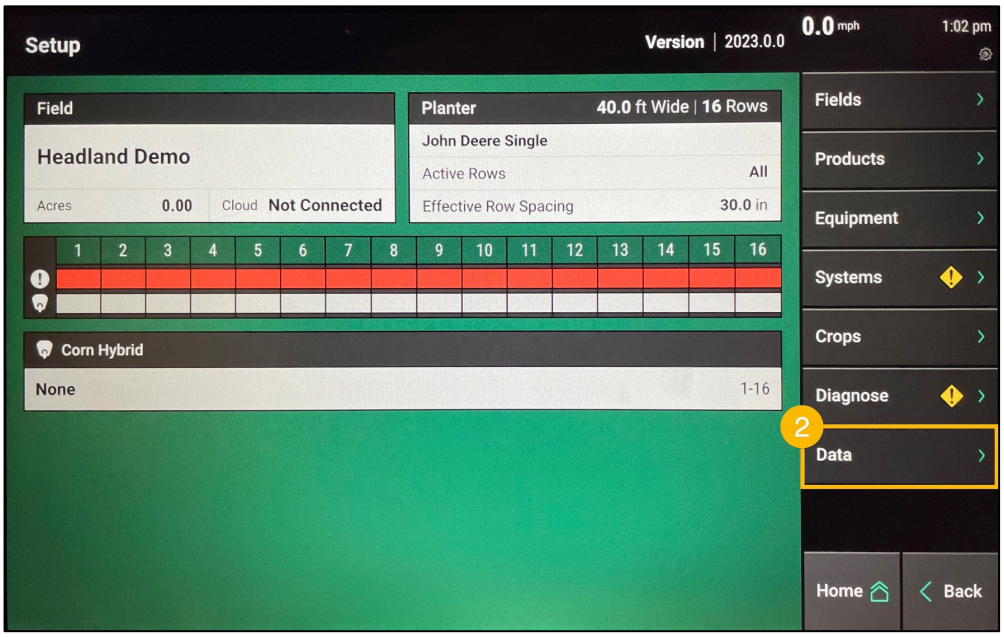


1. On the 20|20 display, navigate to **Setup**

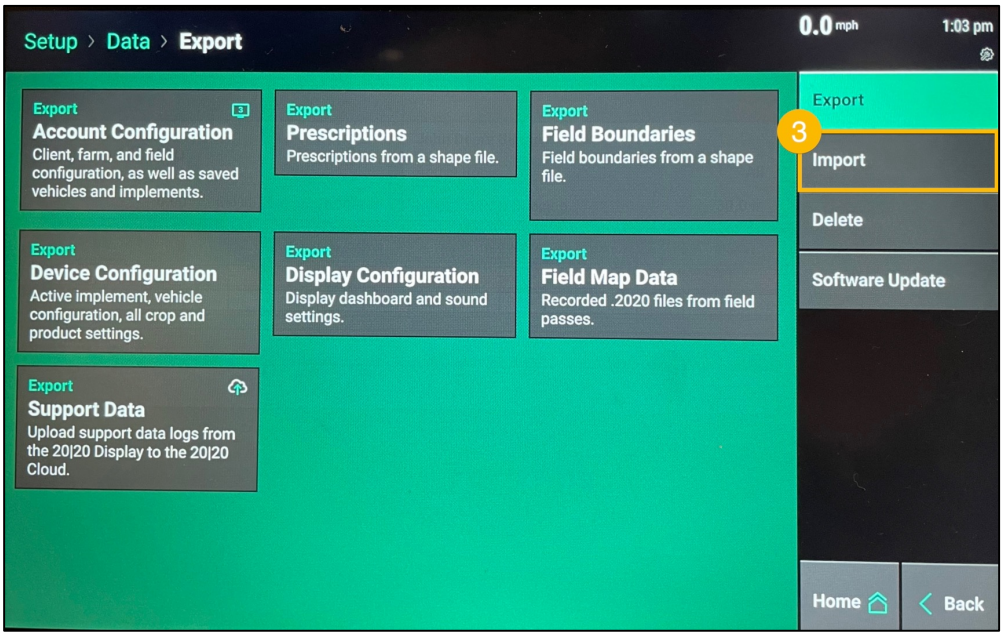


# Syncing and Executing Prescriptions on Gen 3 20|20 (Continued)

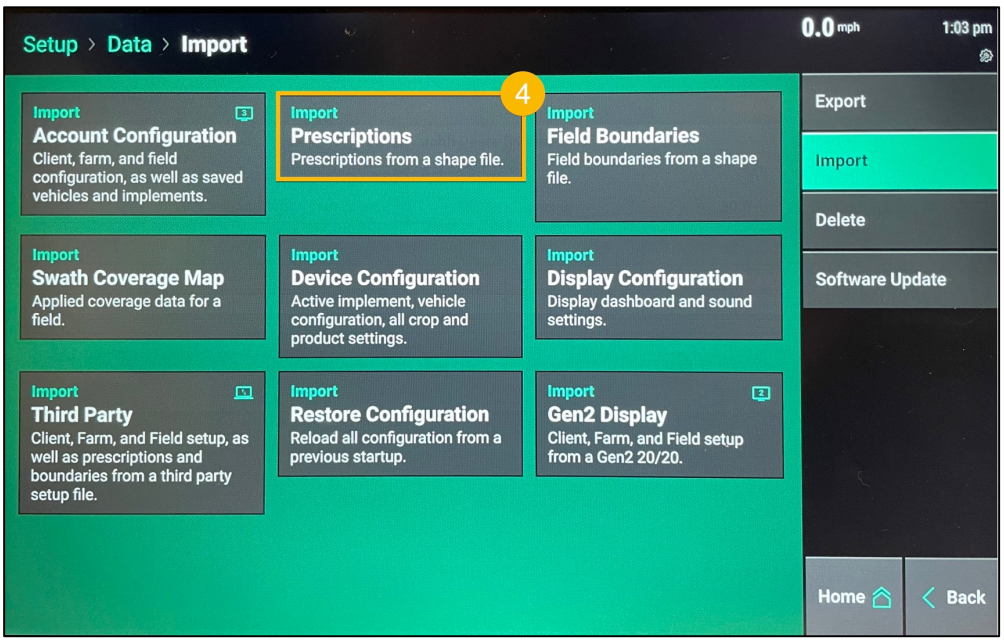
2. Select **Data**



3. Select **Import**

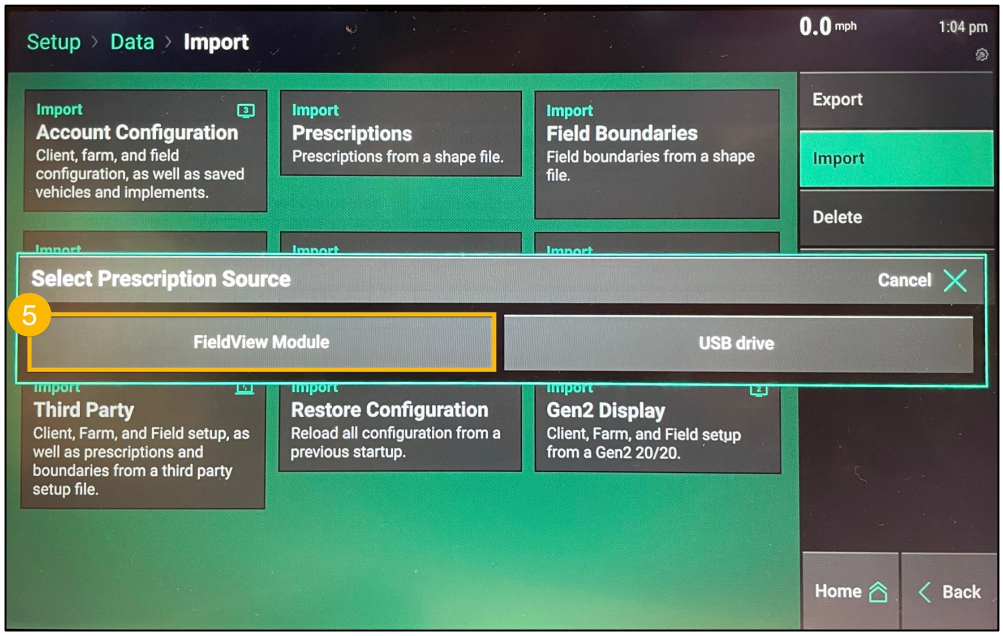


4. Select **Import Prescriptions**

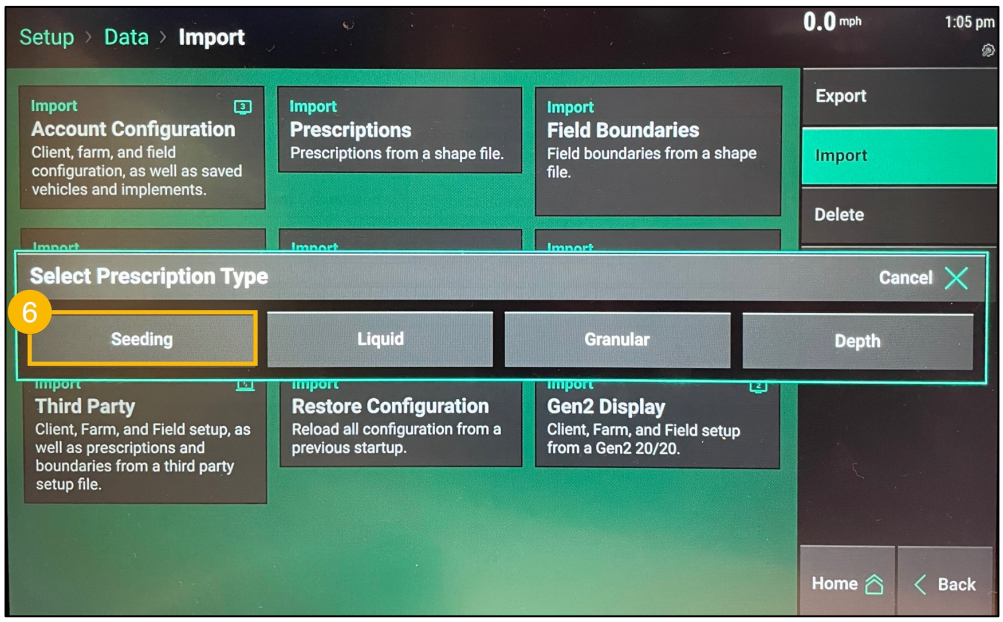


# Syncing and Executing Prescriptions on Gen 3 20|20 (Continued)

5. Select **FieldView Module**

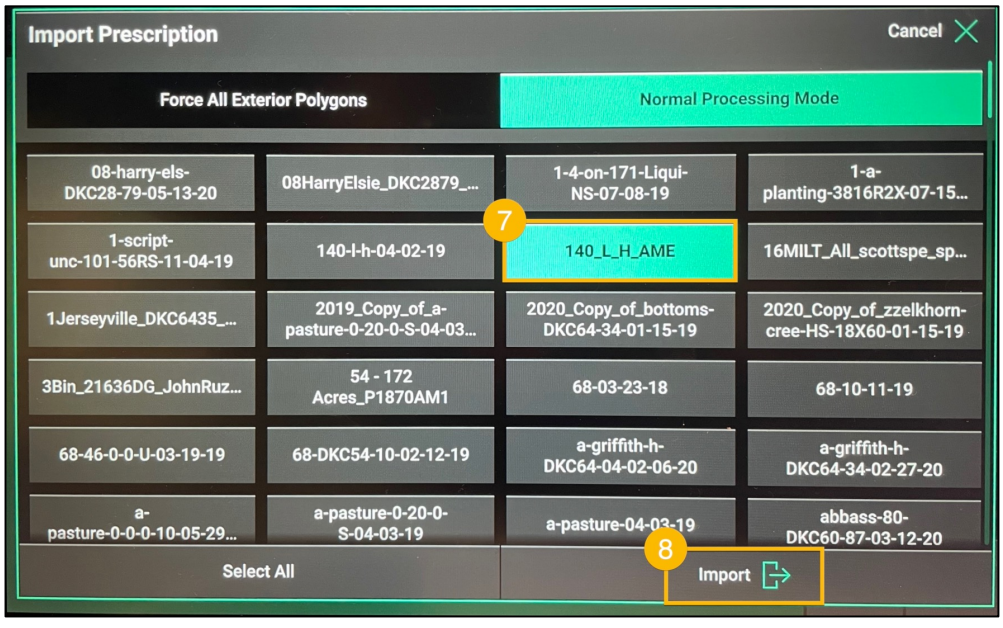


6. Select **Seeding**



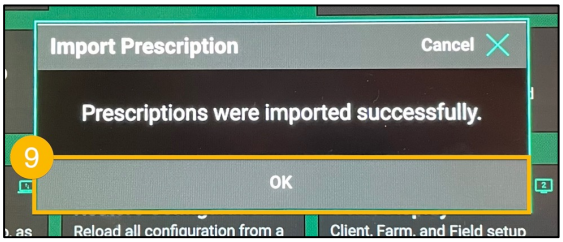
7. Select the prescriptions you are wanting to import

8. After selecting prescriptions, select **Import**



# Syncing and Executing Prescriptions on Gen 3 20|20 (Continued)

9. Select **OK**



## Executing Prescription

1. Click on **Setup > Fields > Active Field > Seeding** (Under Field Prescriptions)
2. Click on the box next to “Seeding Prescription” and select desired prescription from the list – the attribute screen will pop up next to select desired attribute
3. Overview the Field Prescriptions section and push **Done**
4. To visualize the map of the script, click the **Home button**, click on the **“Standard”** screen setup on the top of the display screen then click on the **“Select Map Layer”** button, select **“Seeding Prescription”**, click **“Cancel”**, then click on the highlighted icon
