

Agronomic and Economic Data Unite

You use Climate FieldView™ to make your agronomic decisions with confidence.
Now understand the impact to your bottom line.

Real-time insight direct from the field.

Integrate your as-applied and yield data directly from the Climate FieldView™ cloud into all aspects of your business including crop plans, inventory management, land ownership and financials through the Conservis platform – **No manual entry. No USBs needed.**

Conservis is the leading **independent** farm management system supporting corporate and enterprise businesses, all the way to multi-farm and family farm operations.

Gain confidence to grow your business with data indicating everything that gets applied to your fields. Conservis' analytics empowers you to see the true cost per bushel and cost per acre to understand the ROI of your field practices.

"We've used Climate FieldView™ for six years and it's come so much further now with Conservis, it saves all of our planting, spraying and harvest data. If you try certain chemicals out, you get test plots and zone it out, and it gives you the cost analysis breakdown."

John Brueggeman
Owner/Operator at Brueggeman Crop Services

Zone Economics

Compare and measure the financial efficiency of your field practices, right down to a zone level. In reality, a high- output field may not be the most cost-efficient. As a result, cost-effective production has become the new measure of success.

Am I getting an ROI on field practices?

With Conservis, your own data can answer:

- Which seeding rates are most profitable?
- Is the added fertilizer cost worth it?
- Was that last spray application really required?
- What part of this field is losing money?

Expect Field-Level Insights with Conservis' Zone Economics

With Conservis and Climate FieldView™ working together, you can end the guessing game and finally understand what's financially most effective.

"What I love about Conservis is being able to see what your inputs are and seeing your return on investment, because that's the bottom line."

Ryan Christensen
Co-Owner of BKR Farms
