

# Finding Your iPad® Device Model

This guide is designed to help you determine which iPad model you need to purchase or if you need to update your current device.

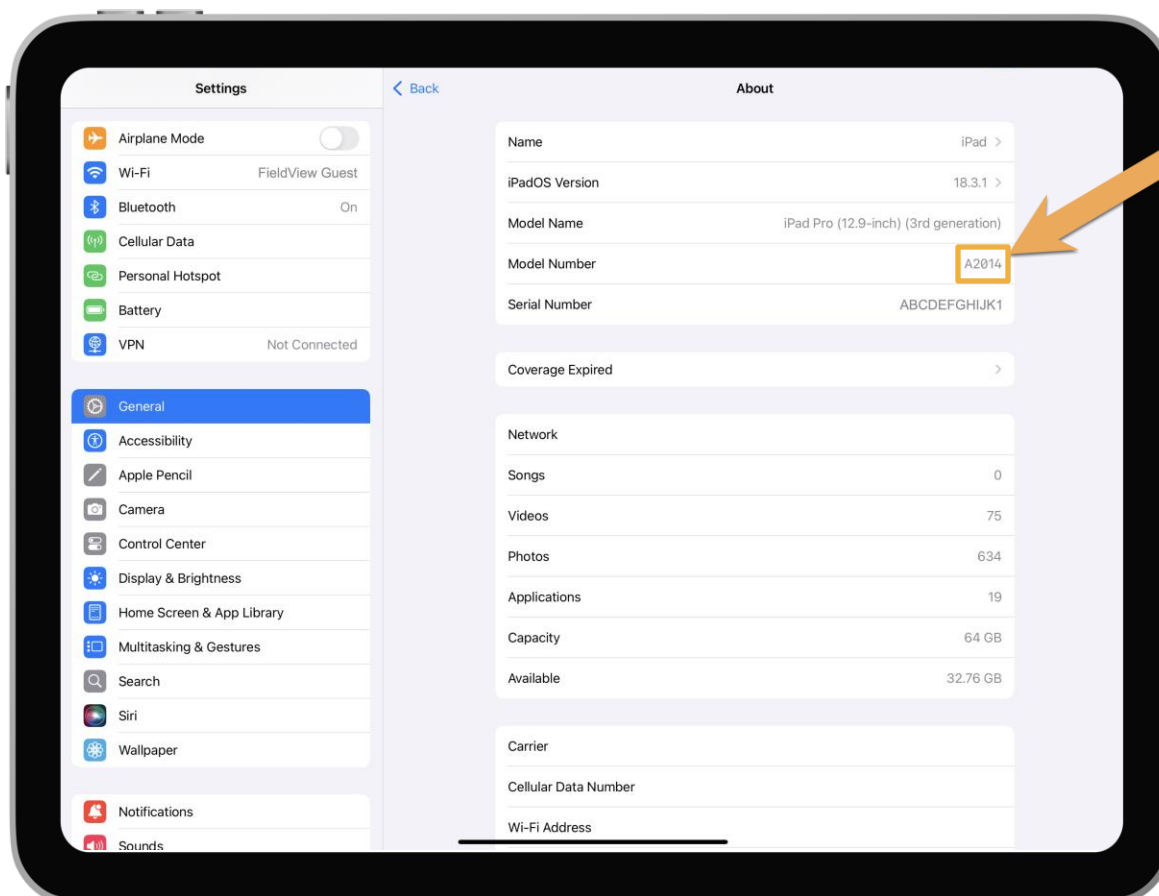

## GENERAL INFORMATION

- As of March 2025, if you are purchasing a new iPad® device to run the FieldView™ platform apps, we recommend purchasing either the **iPad Pro®** or **iPad® series**. A minimum capacity with either 128 GB (for operations with 1500 acres or less with only 1-2 years of historical data actively on the iPad) or 256 GB (for larger operations with higher acreage or more historical data) is recommended. **If purchasing an iPad with a USB-C connector, a USB-A to USB-C cable is required when using a Precision Planting 20|20® monitor.** FieldView Starter Kits now include USB-C cables.
- Generally, you can expect to get about **5 years of supported use from the date the iPad® device was released.**
- In order to update FieldView™ Cab app beyond 13.0, you must utilize an iPad that is capable of updating to iOS 16 or beyond. FieldView currently only supports iOS 16, 17, and 18.
- CloudSync is not supported on FieldView™ Cab App 8.0 and older.

## FINDING YOUR IPAD® MODEL INFORMATION

To determine the model of your iPad® device, navigate to **Settings**, tap on **General** and then select **About**. The model number here will help to determine the year of your iPad. This number can also be found on the back of the iPad. It may be difficult to read. Utilize the table below for more details regarding iPad year and model.

Tap here to display the 5-digit model number. The model number will begin with the letter A.

See table on the following page to determine your iPad® device model name once you have found your model number.
