Harvest Notes (Tap to Edit)

- From the More menu, select the **Harvest Summary Report**

- Scroll down to the **Combine** section.
- Tap on **Adjust Combine Yield**.
- The report will disappear and adjustment controls will appear.

There are two ways to adjust yield:

- Select the **Minus** (A) or **Plus** (B) for either combine to adjust weight up or down.
Note: As the weight is increased or decreased the map will update to reflect the change and every other combines weight will also be adjusted so that the overall field weight stays the same.
- OR
- Tap the **Auto-Adjust** (C) button to automatically have yield distributed to the area harvested by each combine.
- Tap **Cancel** to stop and exit without saving.
 - Tap **Done** to complete the adjustment.
 - These adjustments will be reflected in the Field Region Report and Yield Analysis following the next CloudSync.
