

Yield Analysis

Enhance your productivity with in-depth seed, crop protection, and field performance analysis. Turn the information you have into the answers you need.

**FIELD
VIEW™**

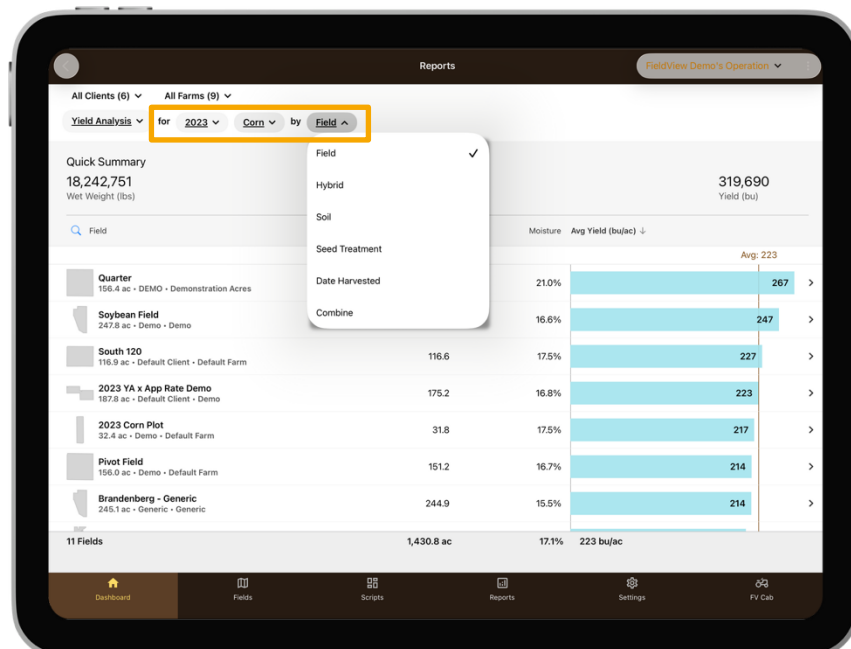

Creating a Yield Analysis Report

1. Establish an internet connection with your mobile device and select the FieldView™ app.
2. From the Dashboard screen in the FieldView app, find the Yield Analysis card. Review the status card of a snapshot of the most recent harvest activity documented by FieldView.
3. Tap the Yield Analysis card to view more detailed yield data for products planted on your operation.

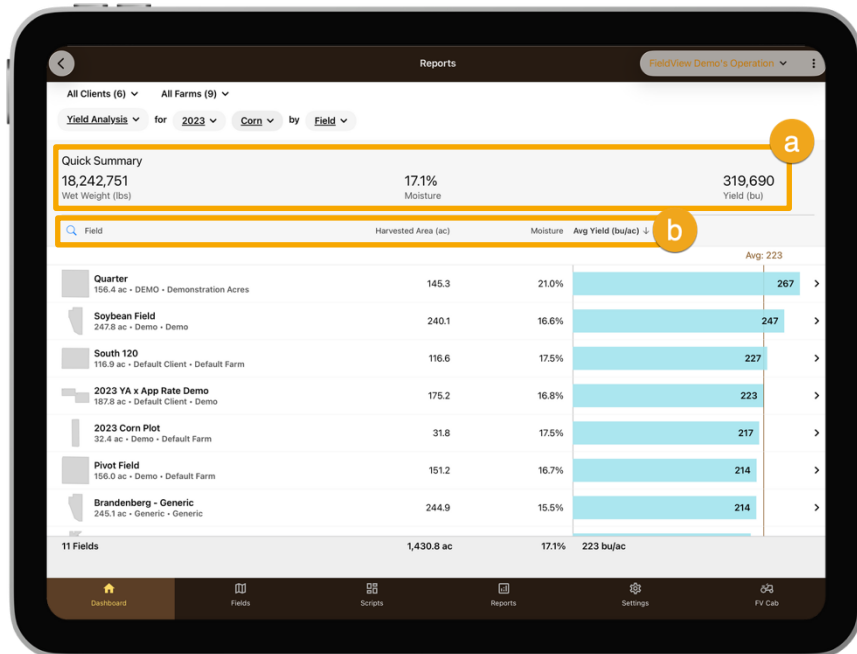

Reviewing Harvest Data

1. At the top left of the Yield Analysis screen, select Field Variety, Seed Treatment, Date Harvested, or Combine to choose which report you want to review.
2. Review data for a specific field by tapping on the Field Name.
3. To view data for a specific year and crop, use the dropdown menus in the upper left.

Yield Analysis (Continued)

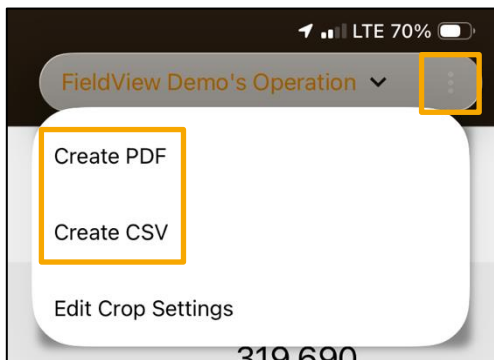

- Each Yield Analysis page has a Detailed Summary near the top. This summary displays the overall harvest results for a selected crop, including number of fields, total, harvested acres, wet weight, average moisture and average yield per acre.
- Sort Yield Analysis results by Field Name, Average Yield, or Harvested Acres. Tap on any column heading to toggle the sort feature in ascending or descending order.

Yield Analysis CSV/PDF Report

For easy access and sharing, the Yield Analysis Report can be viewed as a CSV or PDF file that can be emailed, printed, and/or saved directly from your mobile device.

PDF Report:

CSV Report:

Close				Preview							
Field	Harvested Area (ac)	Moisture	Avg Yield								
Quarter	145.3	21.0%	267								
Soybean Field	240.1	16.6%	247								
South 120	116.6	17.5%	227								
2023 YA x App Rate Demo	175.2	16.8%	223								
2023 Corn Plot	31.8	17.5%	217								
Pivot Field	151.2	16.7%	214								

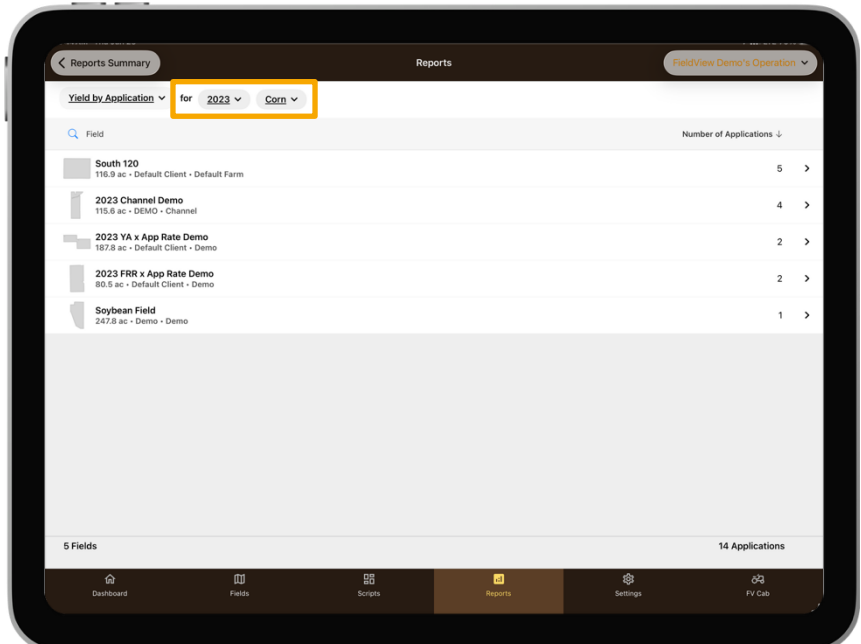

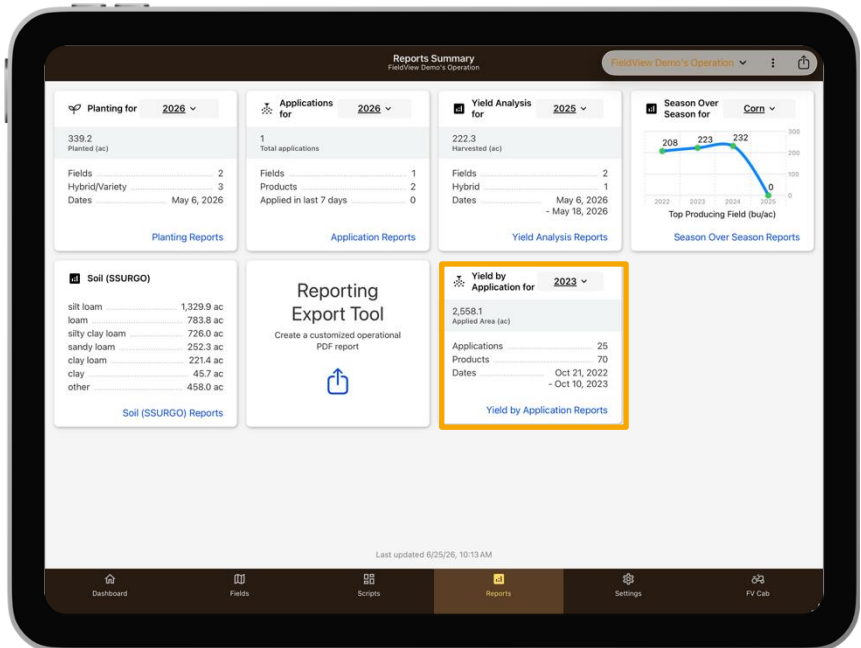

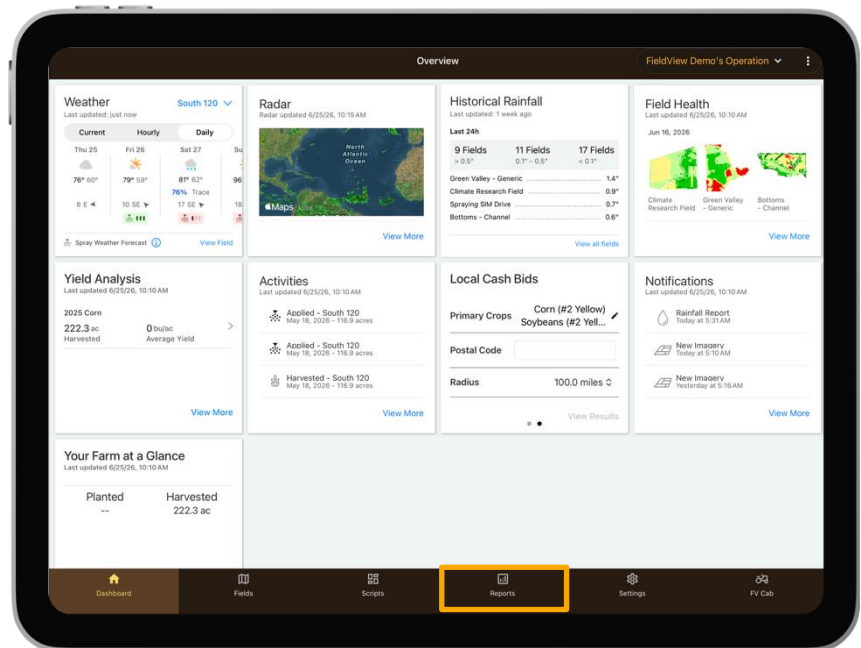

Yield Analysis (Continued)

Yield Analysis by Application

Yield Analysis by Application helps you perform field level analysis to determine how the crop protection and fertility products you applied throughout the season impact yield. This feature helps identify what worked, what didn't, and what could be next year.

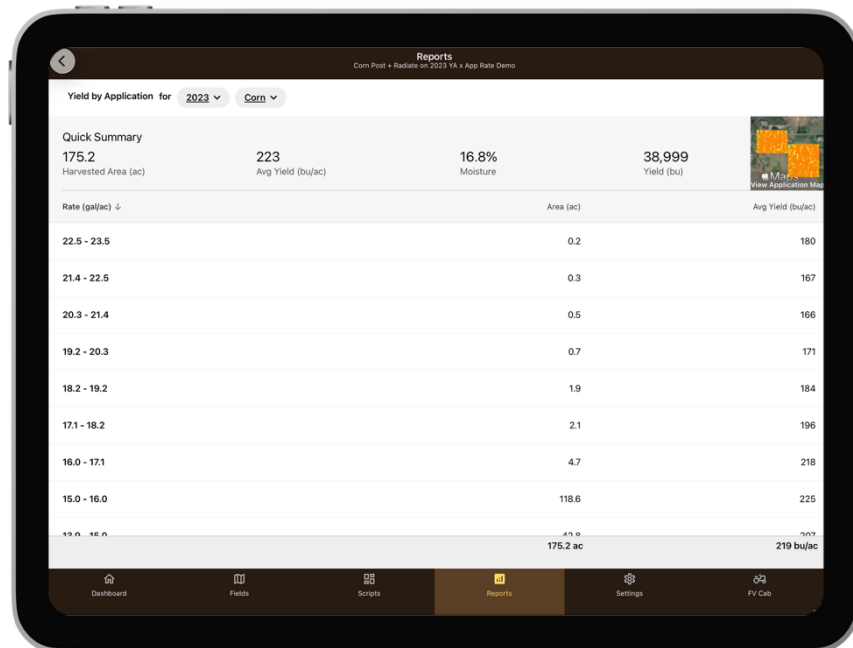

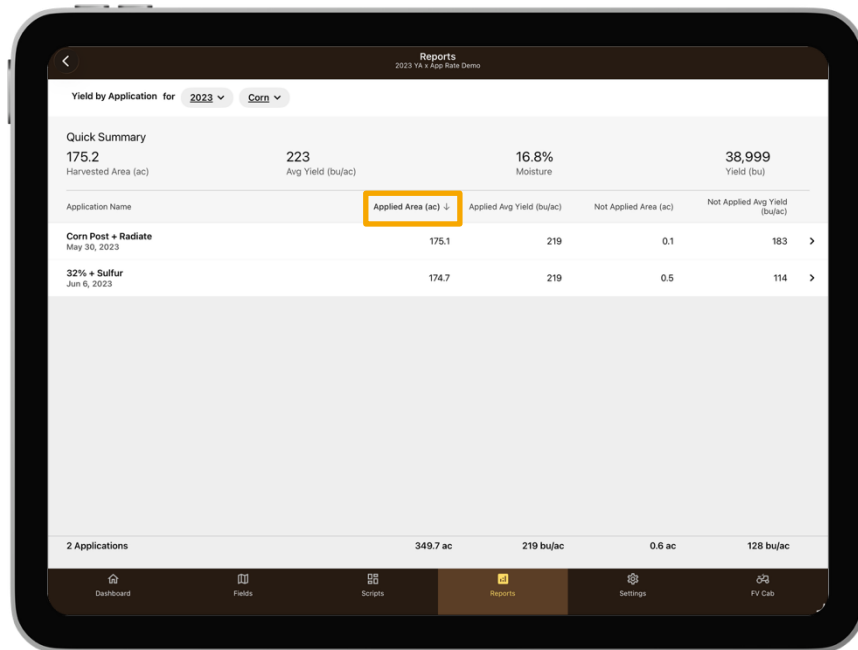

1. Open the FieldView™ app
2. Tap **Reports**
3. Scroll to **Yield by Application** for a given year
4. Tap **Yield by Application Reports**

Here you can toggle the year and crop you wish to view and can sort by number of applications.

Yield Analysis (Continued)

5. Tap into the field to dive deeper into the data – you can view harvested area, average yield, percent moisture, and total yield for your operation.
6. Tap to sort by applied area.
7. Tap into a specific application to view the rate applied over a certain area and average yield by bushel per acre.
