

Post Harvest Yield Adjustments in the iOS™ FieldView™ App

Post harvest yield adjustments can be accomplished at the whole field level in the FieldView™ app. Adjusting field yield will impact the harvest values for the chosen field for the selected crop and season.

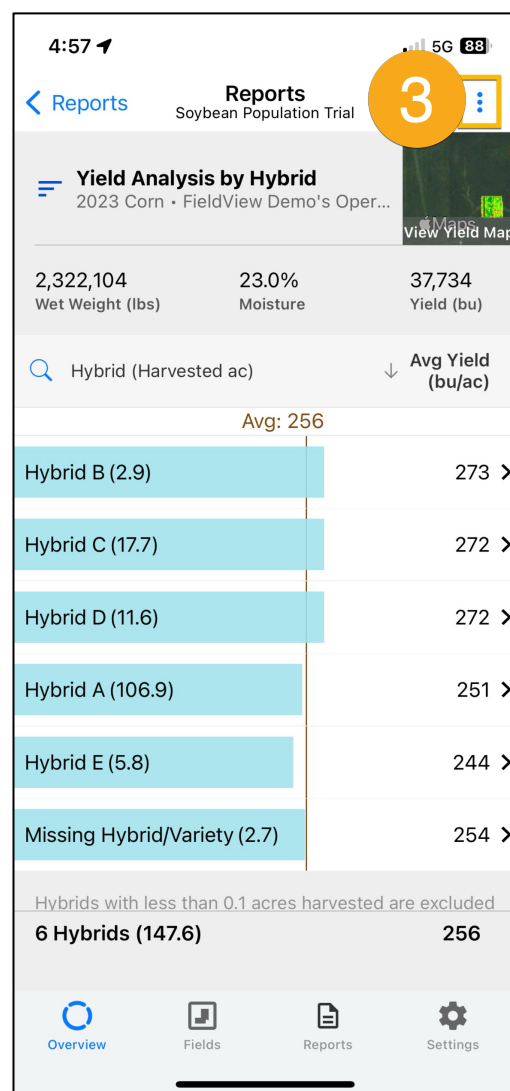

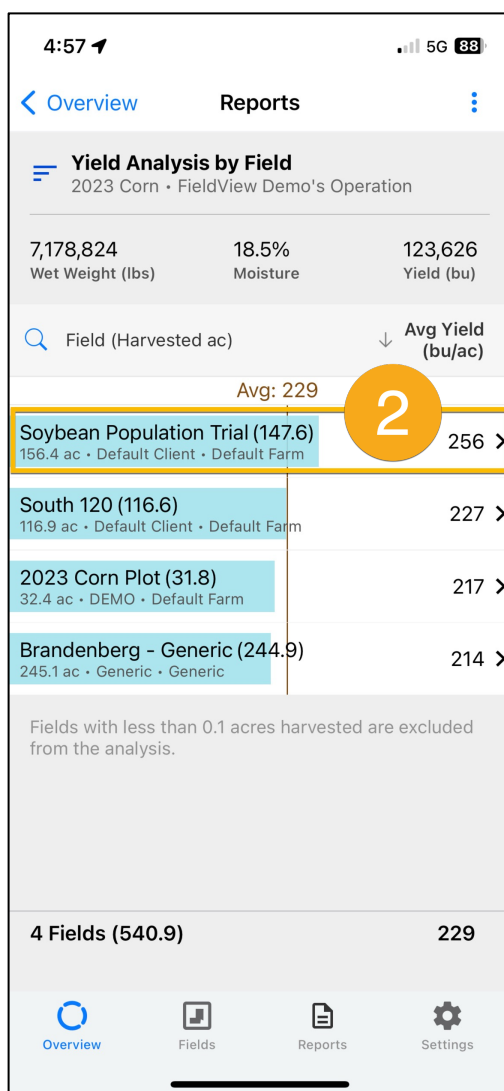

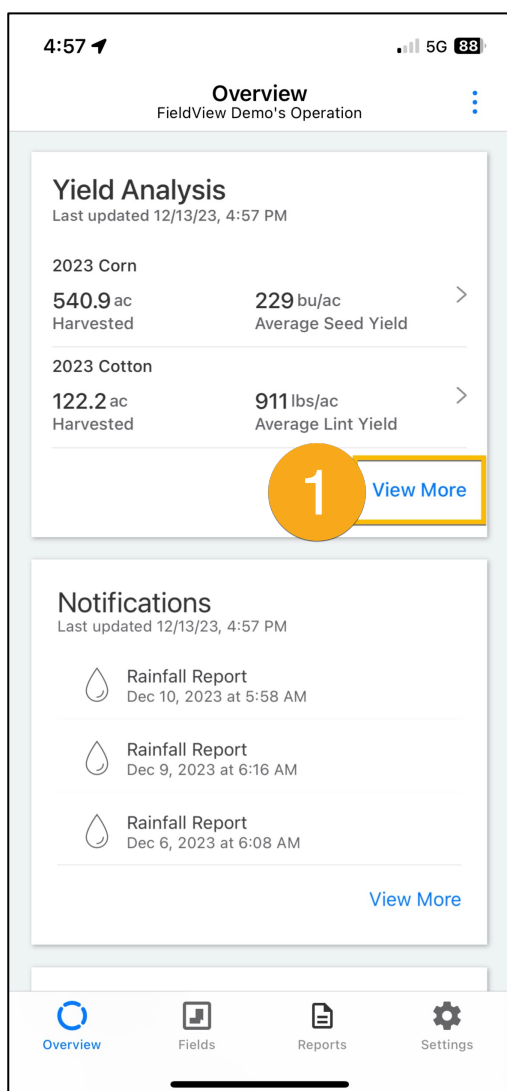

Values that can be edited (depending on crop type) include:

- **Harvested Area**
- **Wet Weight**
- **Moisture**
- **Turnout Percentage**

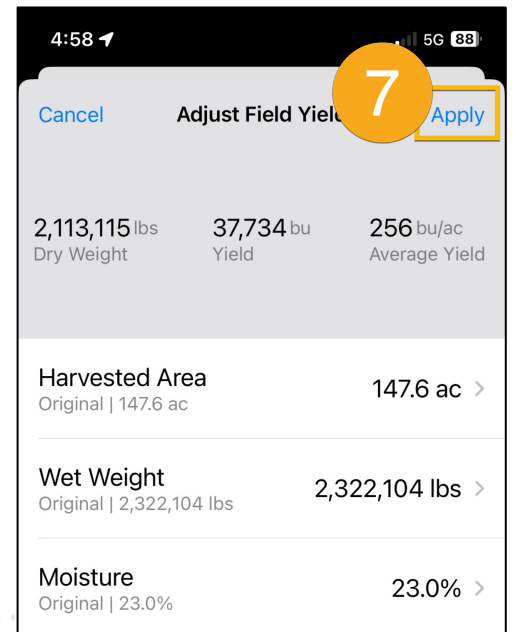

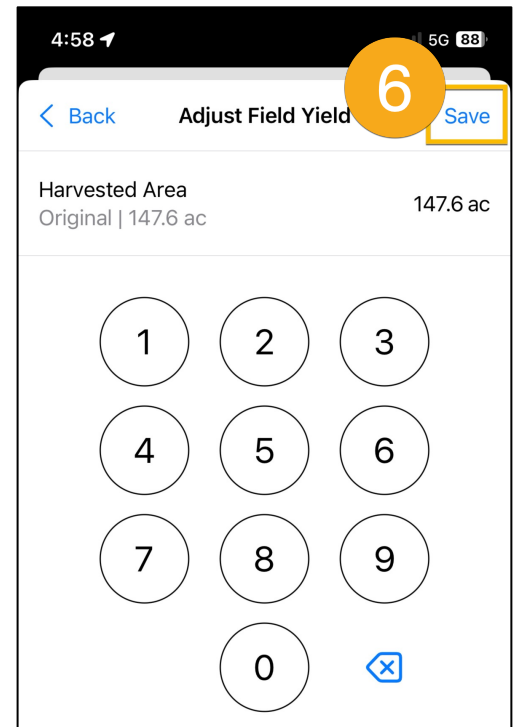

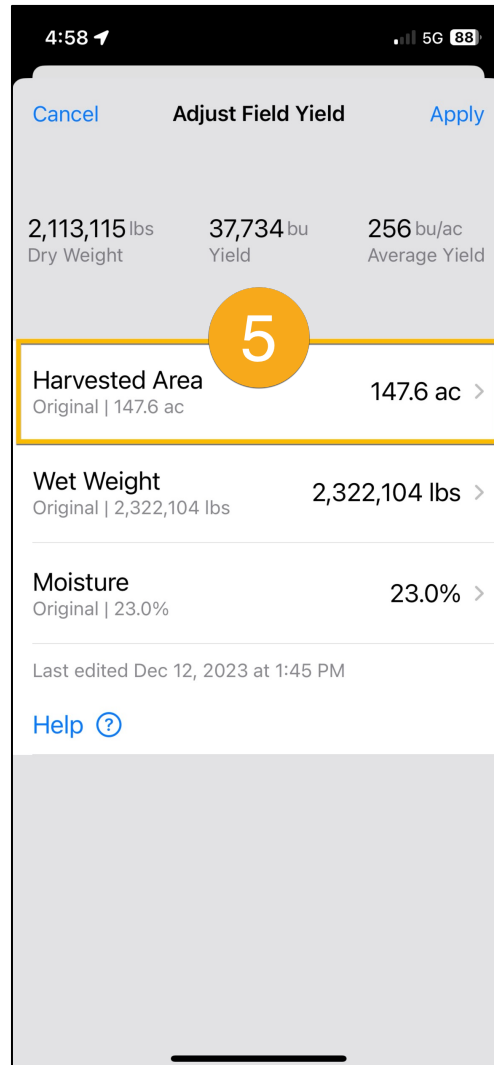

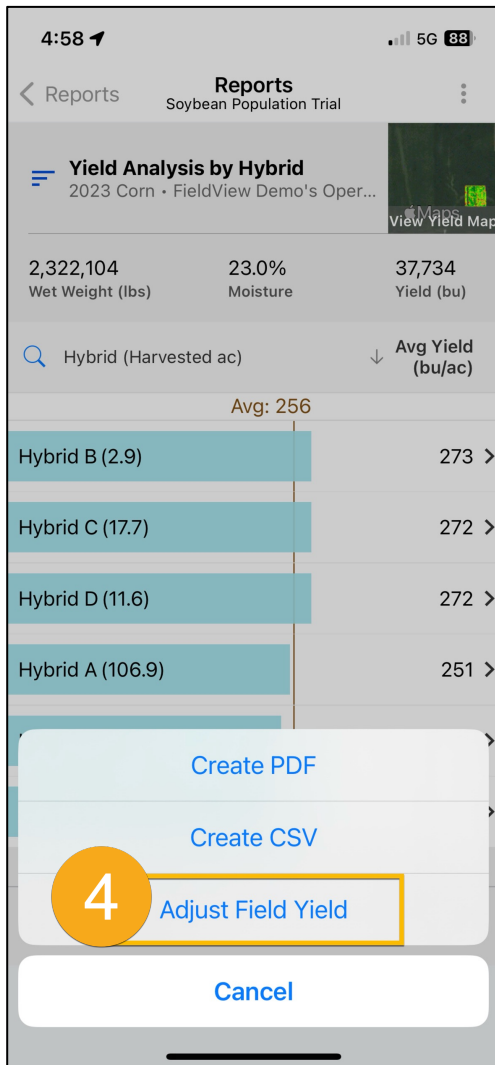

To adjust field yield in the FieldView app following harvest, follow these steps:

1. Navigate to the **Yield Analysis** card on the Overview screen
2. Select the field you want to make the yield adjustment for
3. Select the **three dots** in the top right corner

Post Harvest Yield Adjustments in the FieldView™ App (Continued)

4. Select **Adjust Field Yield**
5. Choose the value that needs adjusted
6. Enter the correct values and click **Save**
7. Once all the values show the correct amount, click **Apply**
