

# Connecting Your CLAAS TELEMATICS Account with Climate FieldView™

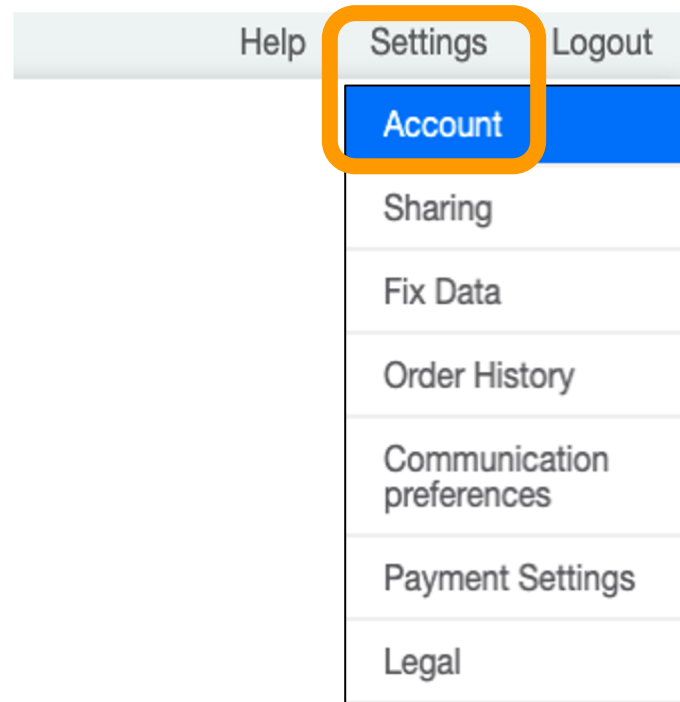

As of March 15, 2021, FieldView customers using CLAAS TELEMATICS can now access CLAAS-generated yield and grain moisture maps, seamlessly through their FieldView account using the new API integration.

## What is an API?

API is the acronym for Application Programming Interface, which is a software intermediary that allows two applications to talk to each other. In this example, the API allows CLAAS TELEMATICS and FieldView to talk to each other.

## How to Connect Climate FieldView With CLAAS TELEMATICS

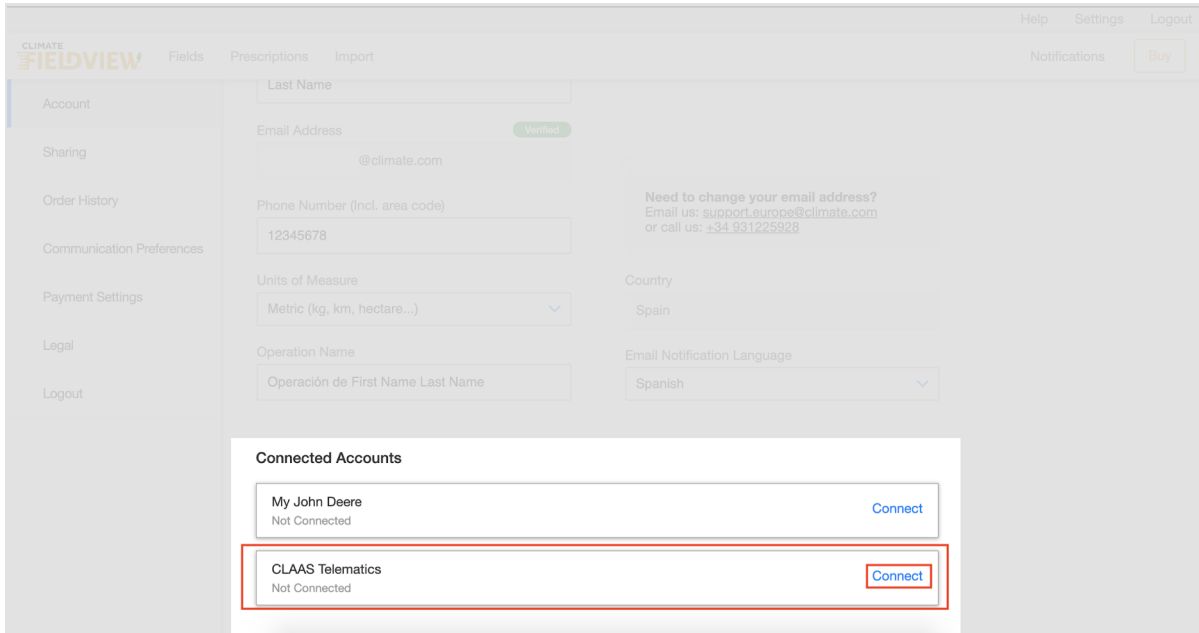

1. Login to your FieldView account on your desktop computer.
  - Accessing [climate.com](https://climate.com) should automatically direct to your local site
2. Select **Settings** in the top right corner of the screen and choose **Account** from the dropdown menu.

**For questions, contact your local FieldView support team or email [support@climate.com](mailto:support@climate.com).**

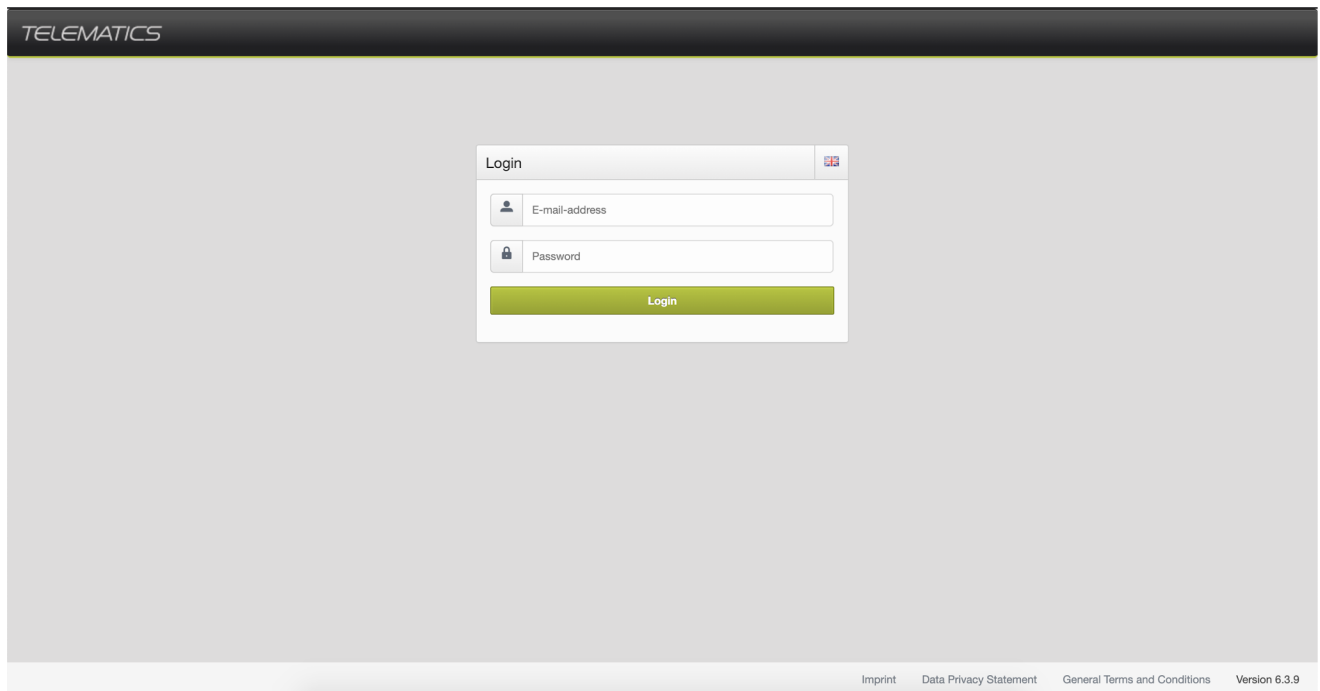

## Connecting Your CLAAS TELEMATICS Account with FieldView™ (Pg 2)

- From the Account Information page, scroll down to “Connected Accounts” and click the “Connect” button corresponding to CLAAS TELEMATICS.

The screenshot shows the FieldView account information page. The 'Connected Accounts' section is visible, listing two accounts: 'My John Deere' and 'CLAAS Telematics'. Both are marked as 'Not Connected'. The 'CLAAS Telematics' entry is highlighted with a red box, and its 'Connect' button is also highlighted.

- Enter your CLAAS TELEMATICS credentials to connect the account to your FieldView account.  
*Important note: Use your CLAAS TELEMATICS email address (not username) and your password.*

The screenshot shows the CLAAS Telematics login page. The page features a 'Login' form with fields for 'E-mail-address' and 'Password', and a 'Login' button. The page header is 'TELEMATICS' and the footer contains links for 'Imprint', 'Data Privacy Statement', 'General Terms and Conditions', and 'Version 6.3.9'.

**For questions, contact your local FieldView support team or email [support@climate.com](mailto:support@climate.com).**

Our services provide estimates or recommendations based on models. These do not guarantee results. Consult your agronomist, commodities broker and other service professionals before making financial, risk management and farming decisions. ## 5. Review the disclaimer and press “Issue Data Share”

**Activate data sharing**

Test

You hereby enable The Climate Corporation FIELDVIEW (hereinafter referred to as API-Partner), the provider of your farm management system, to access the data listed below, which CLAAS Service and Parts GmbH (hereinafter referred to as CLAAS) collects within the framework of the service contract signed with you on the provision and use of telemetry data of your agricultural machine. In addition, you enable the API-Partner to transfer field related data to CLAAS so that the data retrieved can be assigned to the field depicted in the API partners farm management system. These are:

- Location: GPS-Position, GPS-Height, Heading
- Machine data: Speed, Work state, Rotation speed
- Process data: Throughput, Output, Output per area
- Machine settings: Calibration factors, different component positions
- Counters: Operating hours, Fuel consumption, Area
- Task Data: field name, task number, farm

Further details can be found in the CLAAS data protection declaration ([https://www.claas-telematics.com/Telematics/res/legal/Telematics\\_DPS.pdf](https://www.claas-telematics.com/Telematics/res/legal/Telematics_DPS.pdf)).

Please note that this may enable the API-Partner to transfer your data to a country that does not have the same data protection standard as the country in which your telemetry data is processed by CLAAS. You can revoke your consent at any time free of charge in the settings on the [www.claas-telematics.com](http://www.claas-telematics.com) website. In this case, CLAAS can no longer synchronize your data with the API-Partner as described above. In this case, CLAAS will no longer be able to provide you with the whole set of telemetry data services provided in the service contract concluded with CLAAS. The revocation does not affect the lawfulness of the processing of your data until the time of revocation.

I agree

**Issue data share**

Imprint Data Privacy Statement General Terms and Conditions Version 6.3.9

## 6. Upon successful connection, your data will start transferring from CLAAS TELEMATICS into your FieldView Data Inbox and will be available within 24 hours.

## Connecting Your CLAAS TELEMATICS Account with FieldView™ (Pg 4)

- Proceed to your FieldView Data Inbox and import data into your account by selecting the files and clicking “Import”

*Note: After you establish the initial connection, files from a recent completed activity should become available in Data Inbox within 24 hours.*

The screenshot displays the 'Data Inbox (18)' interface in FieldView. At the top, there is a header with the 'CLIMATE FIELDVIEW' logo, the text 'Operación de First Name Last Name - Owned', and buttons for 'Upload File' and 'Close X'. Below the header is a navigation bar with tabs for 'Fields (4)', 'Planting', 'Prescriptions', 'Applications', 'Imagery', 'Harvest (14)', 'Soil Tests', and 'Imported Shapefiles'. A table below the navigation bar lists boundary files. The table has columns for 'Boundary File', 'Field', 'Client', 'Farm', 'Hectares', 'Source', 'Action', and 'Field Assignment'. Four rows are visible, each with a checked checkbox in the 'Boundary File' column and a greyed-out 'Field' column. The 'Source' column for all rows is 'claas-data-downloader' and the 'Action' column is 'Import and create new boundary'. At the bottom of the table, there are buttons for 'Re-run Field Assignment', 'Delete', and 'Import (4)'. The 'Import (4)' button is highlighted with a red border.

Boundary File	Field	Client	Farm	Hectares	Source	Action	Field Assignment
<input checked="" type="checkbox"/>					claas-data-downloader	Import and create new boundary	
<input checked="" type="checkbox"/>					claas-data-downloader	Import and create new boundary	
<input checked="" type="checkbox"/>					claas-data-downloader	Import and create new boundary	
<input checked="" type="checkbox"/>					claas-data-downloader	Import and create new boundary	

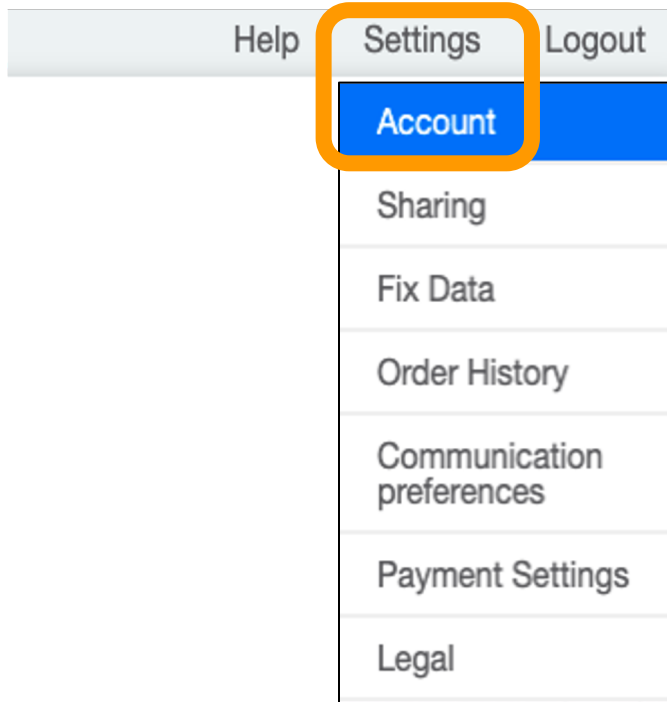

- After transferring the files from Data Inbox, your data will be synced with your FieldView account within two (2) hours.
