Password...

[Forgot password?](#)

Sign In

Step 2

Once signed in, select **Upload shapefiles or planting / harvest data.**

Orders - Nesbitt Farms

Map Fields Upload Boundaries Manage Account

Map fields to place an order

To set up a sample plan for Nesbitt Farms, you need to map field boundaries. You can do this a number of ways:

Draw boundaries on a map

Upload shapefiles or planting / harvest data

Connecting Your Pattern Ag Account with FieldView

Step 3

Next, click on **Connect Outside Accounts** and then **Connect Climate FieldView**

Nesbitt Farms - Boundaries and Data

Two ways to upload field boundaries and data:

Connect Outside Accounts **Upload Shapefiles**

Upload shapefiles of your fields here - make sure you include all files (.shp, .shx, .dbf, etc./) and group those files in a single zip file:

Upload Zip File

The uploaded file must be in a .zip or .gz format, and should contain only the following characters: a-z, A-z, 0-9, -, _

Past file upload

Filename	Upload	Status
----------	--------	--------

Connect to outside accounts to easily import field boundaries and data layers into Pattern Ag

 Connect your data from John Deere **Connect John Deere**

 Connect your data from Climate Field View **Connect Climate Field View**

Step 4

On the following screen, enter your FieldView username and password to **Log In**

How do we connect?

- [Login](#) to your existing Pattern Ag account.
- In Pattern, go to **Upload shapefiles or planting / harvest data > Connect Outside Accounts** and find Climate FieldView.
- This connection process is further detailed with screenshots in our Integration Guide.

What data is shared?

- Basic Account Information (name, email, etc)
- Farm, Field and Boundary data
- Field Activity data (planting, application, harvest)

What is the value?

- Easy account setup within Pattern - quickly create accurate, matching boundaries
- Compare detected threats and nutrient levels against planting and application practices to evaluate protection
- Push prescription files from Pattern to FieldView
